

# LEVEL UP YOUR BUILDING'S ACCESS CONTROL

Introducing the new Temaline, multi-technology readers.

**Honeywell**

# READING MADE SIMPLE

The new generation of readers evolves from the previous Temaline readers, bestseller with more than 30.000 units installed worldwide – suited for a variety of business verticals, such as airports, banks, schools, and more.

The modern and minimal design falls in line with latest industry aesthetic trends, blending in seamlessly with any building's interior. These modern devices use advanced reading technology that empowers a seamless migration process to the latest, more comfortable and secure reading technology so you can effortlessly change your readers for one part of your building or for all of it, depending on your business needs.

The new Temaline readers can replace their predecessors, fully covering the same space. This new generation of readers supports Bluetooth connection and is fully compatible with Honeywell Forge Occupant Experience Mobile Access, in conjunction with other access cards.

## FLEXIBLE BY DESIGN

With two modern design options to choose from, pick the one that best meets your needs and fits your environment, or mix them to address complex requirements.

The Mullion reader is a smart choice for minimal spaces, near doors or on turnstiles, fitting every zone that requires simple access indicators, like color-changing LEDs and audio signals.

The Compact reader comes with a keypad and a two-line display that suites areas where advanced Access Control Management is required – for example, zones where PIN codes are used or airport boarding gates, that need to stay securely open until all passengers have boarded the aircraft. It can be installed both in vertical and horizontal position, with no compromise on ergonomics.

Both devices are suitable for outdoor installation, and equally valid for challenging environments like manufacturing sites.

## THE TEMA-VOYAGER™ COMPACT - ALL-IN-ONE DEVICE

To complete the offering, the Tema-Voyager Compact device comes with multi-technology reader capabilities, with optional Wi-Fi™ connection, and a stylish, robust design.

Benefit from an autonomous solution that can manage a large number of employees, with theoretically unlimited access levels. Directly connected through a LAN or wireless connection, the Tema-Voyager Compact features on-board intelligence and storage – and keeps managing door access even in case of communication failure.

Forget about cabling with Wi-Fi capabilities that make this device easy to install in remote places and on moving vehicles. Along with high-level functionality, the Tema-Voyager Compact comes with the ability to support up to four different languages – providing a simple and efficient interaction for every employee.

Despite its endearing design, this reader is suitable for demanding environments thanks to the IP65 rated enclosure, with no compromises on advanced features like:

- Self-adjusting color display, aligned with existing light conditions.
- User-friendly design, adaptable for users with impaired vision, hearing, or mobility.
- Different mounting options that ensure an optimal installation position.
- Customizable display with customer logo.

All devices support the Honeywell Forge Occupant Experience

# READ THROUGH THE BENEFITS

## RELIABILITY

Trustworthy devices with significantly low-fault rate.

## ADAPTABILITY

Suited for challenging environments exposed to dust, ice, rain, low or high temperatures.

## FLEXIBILITY

Meets various door management needs, from airport boarding gates to circle-lock doors in banks, and more.

## VERSATILE

Setup is easy for both vertical installation on doors and wall, or horizontal installation on turnstiles.

## USER-FRIENDLY

Easy-to-use device with simple and clear visual and audible indicators.

## Get the Full Experience

Take advantage of all EBI-Temaline functions and get the best out of your system – ensuring the safety of your staff and visitors, and the security of your facility and assets. Evolve your premise in a smart building with enhanced energy, efficiency, and comfort

- Access Control
- Time & Attendance
- Intrusion Detection
- Visitor Management
- Lift Security
- Muster

Available in Apple App Store. Requires iOS 9.0 or later. Compatible with iPhone 5S or later. Also available in Google Play Store. Requires Android 6.0 or later. Compatible with Google, Nexus and Samsung devices.
